

Mockup Feedback

Hi Elena!

First of all, I want to say that the mockup looks really nice overall. You really captured the educational yet engaging feel that I was after, I like the images you chose to pair with each section a lot. The background image on the sidebar also is working really nicely, and helps to give the feeling of being submerged while not dominating the page. I really like the display font you chose for the titles too, the way it's distorted gives it a watery feel. In terms of things I might want to change, I think the color scheme could rely on neutral tones a little more, like replacing the white background color with a soft beige or something similar. You use a pinkish brown color a few times and I like that it reminds me of a goblin shark's skin tone but it feels a little out of place to me right now. Maybe bringing it back elsewhere or just changing it to another blue or something would help. I feel similarly about the light grey of the sidebar titles, maybe use bringing that in elsewhere or perhaps the two could be the same color. The only other thing I can think of is that the body text feels a little small, maybe it could be just a point or two bigger. Thanks so much!
