

Site Build Feedback

Hi Elena!

The site you built is looking wonderful. I'm really glad you added the off-white tone as the background color, which goes nicely with both the dark blue of the titles and with the secondary purple-grey. I have a few minor adjustments that it would be great if you could make. First off, you have two images right now accompanying the feeding subsection which both show the shark's slingshot feeding method. I think this feels redundant, and because the dark blue one has informational captions, I think you should get rid of the other one and replace with a photo. The menu on the left side of the screen looks great, but I'd like the menu items to be spaced a little farther apart from one another. Lastly, the page doesn't seem to adapt very well to a changing window size, so that could also be developed.

Thanks so much, great work!
